DREAD OF DEATH. There are to whom the light of life Is yet in all its morning glory ; And much they dread the sickening strife, That closes life's eventful story.

To them the hours of life are bright, Fair hope each rising day ador And scenes of joy and forms of light Cluster around each opening morning

They have not learned that hopes deceive, That friends betray and foes entrare, They dread the voice that bids them leave A scene so bright, a world so fair.

The here and there a cloud appears To dim the beauty of their skies, Yet, scattered o'er their soming years, A thousand stars in glory rise.

How can they die, and leave a world, Whose sweets as yet they've scarcely tasted, Ere joy's bright wings are half unfurled, Or rapture's golden sands are wasted !

Oh no! but they must live a while, And erop lite's flowers while in the blossom, And feast their eyes on beauty's smile And rest on friendship's faithful bosom.

Like is too sweet too precious now For them to leave; the vernal wreath Of youth is fresh upon their brow, And morning airs around them breathe.

But they as yet have only known, Lafe's morning blush and sunny skies, Nor oft has dis prointment thrown Its solemn shadows o'er their eyes.

Some days may pass in gladness on Brightened by joy's meridian light But it is well if life's young dawn Sink not full soon to sorrow's night.

STANZAS.

Bear me sfar, my gallant back, Far o'er the foaming sea; The' its storms are rude and its waves are dark, Darker, is fate with me. For fading fast, are the fairy flowers, And fied are the hope-enchanted hours,

From the home which I gladly leave; Where those whom I deem'd my friends could stuile But to ruin and deceive. Firewell, my native land, farewell I will not curse thee, no; Thou art bound to me, by a holy spell

Bear me afar to some distant isle,

And to leave thee, tears will flow. I had hep'd too much, and thought them true, That were falser than the wind; My native land, there are none in you, I sigh to leave behind. Not one fold yes, one, one will weep, She will, perhaps is true, But when dead, in some distant Lind I sleep, She may forget me, too.

Can she forget me ! faney strays, To the hours when we have met; Is leighter, earlier, happier days, She never can forget, Walt thou go with me, gentle one, Over the deep dark sen?

My said is those, yet I must be gone, Oh! lov'd one, come with me. There's a tear in thine eye, and a cloud on thy brow,

Heed not what others say ; Three are none who love like me, ah! now Ny dearest, come away. My bark is safe, and on my breast. Whose anguish thou wilt cheer; lassfety, sweet one, shalt thou rest,

And I'll watch o'er thee dear,

THE LADIES' FRIEND.

From the English Quarterly Review we extract the subjoined eloquent paragraph. The writer is speaking of the mother of a family in the middling class of society—that class which is the solid basis of all worth and prosperity.

"There they might behold—though perhaps they might not comprehend—women in all her glory; not a doll to carry silks and iswels a new ever English sailors are in an American part, or deter the most entergoing samily from the adthey might not comprehend—women in all her glory; not a doll to carry silks and jewels, a puppet to be dangled by coxcomb children, and dol for profane adoration; reverenced to-day, discarded to-morrow; always jostled out of the true place which nature and society would assign her by sensuality or by contempt; admired but not respected, desired but not esteemed; ruling by fashion, not by affection; imparting her weakness, not her constancy, to the sex which she should exalt; the source and the mirror of vanity. They would see her as a wife partaking vanity. They would see her as a wife partaking the cares, and cheering the anxiety of a hus-band; dividing his labours by her domestic dil-gence, spreading cheerfulness around her; for his sake sharing in the decent refinements of the world, without being vain of them; placing all her pride, all her joy, all her happiness in the merited approbation of the man she honors. As a mother, they would find her the affectionate.

AMERICAN AND ENGLISH TARS.

I have a thousand times observed one peculiar trait in the character of seamen. Whenever English sailors are in an American port, or Yankees in an English place, they are sure to quarrel—but put the same men in a French or spanish saport, and they will unite most firmly against the common enemy. I have often been amused at the promptness and alterity with the English sailors uniformly exponsed our quarrels on the coast of South America.—Without stopping to count noses, to make any tedious and unnecessary investigations of the causes of the row, we commonly received the first "advices" of their arrival and co-operation from seeing half a dozen of the enemy rolling in the gutter, and the rest in full retreat. It was enough for them to see "one of us put upon" by the natives, to induce them to lend us their aid.—Another trait, more amable than "combattiveness," is their unreflecting generosity to each other. Many a time I have seen a group of English and American seamen, whose money was expended before their "liberty" was out, the numbering themselves of packets, shoes and wilk handkerchiefs, to "make a raise" for the liberty was out, the numbering themselves of packets shoes and wilk handkerchiefs, to "make a raise" for the liberty was out, the numbering themselves of packets, shoes and wilk handkerchiefs, to "make a raise" for the liberty was out, the numbering themselves of packets, shoes and wilk handkerchiefs, to "make a raise" for the liberty was out, the numbering themselves of packets, shoes and wilk handkerchiefs, to "make a raise" for the liberty was out, the numbering themselves of packets, shoes and wilk handkerchiefs, to "make a raise" for the liberty was out, the numbering themselves of packets, shoes and wilk handkerchiefs, to "make a raise" for the liberty was out, the numbering themselves of packets, shoes and wilk handkerchiefs, to "make a raise" for the liberty was out, thene numbering themselves of packets, shoes and wilk handkerchiefs, to "make a raise" for the libe between, who and the substantial part of the substanti

The writer of this short notice, lately visited the Springs, and hoarded while there with Mr. E. Marsh, the present owner of the Heeth House, and without intending, in the least, to undervalue other establishments in the neighborhood, is prepared to recommand this as a boarding house, where all who visit it must be satisfied with the entertainment and attendented. Of this number about screen eighths are Friends, and the remaining eighth orthodox. With those facts before him, it will not be difficult for the unprejudiced reader to decide which of these two lt is well known that the society of Friends.

different from other denominations, has never framed a creed to test the faith of its members. Priends hold saving faith to be the gift of God and that no human power therefore can con-that right belief can have no other foundafor it, that right belief can have no other founda-tion than the divine Linux in the conscience, or the witness in ourselves; no human science, there-fore, can impart it: and hence that these are among the things of God, which no man knoweth but by the spirit of God, holy ground, where no mortal can enter on, and live. God alone is competent, and it is his sole perrogative, to illu-minate the dark recesses of the human soul, and to impart the knowledge of himself, according to its cancilly to receive it, from the first dawncapacity to receive it, from the first daws f the gospel day, to the rising of the day a the heart. Such being the doctrines of sing of the gospet day, to the rank gost the star in the heart. Such being the doctrinor of the Quakers, they remain to this day without any written prescriptive articles of faith, or or-fleedow standard; that engine of priesteraft, and

any written prescriptive articles of faith, or or thooks standard; that engine of presecution and schism!

If, however, from the novel state into which the society has fallen, it were believed necessary that a more full or definite expression of its religious faith should now be promulgated, than have hitherto been thought needful, or that mere clear and positive restrictions, than has yet existed, should now be imposed in matters relating to faith and practice, or to either of them, certainly fire sixths of the body are competent to effect this object! No such manimity is this prevailed in those cout write, whose desians have laid the foundation of all the creads in Protestant Christendom. But, in the case before us, strange as it may appear, a small minority of one sixth, and if we melude the neighboung Yearly Meetings, a minority of one sixth, and if we melude the neighboung Yearly Meetings, a minority of one sixth, and if we melude the neighboung Yearly Meetings, a minority of one sixth, and if we melude the neighboung Yearly Meetings, and though the clear were considered to usurp the right, and to exercise the power of detaiting to the body both in their spiritual and secular concerns. Assuming to be the orthodox, or weighty part, and present mind on these infallibility, they issue their mandates in the shape of "Episties"—" Testimonies," and "Declarations;" but, although accompanied with fearful denunciations, they make no impression. They resort to testimonies of discussions, and they harase their brethren with criminal and evil prosecutions, to demonstrate the same different contents. They are recourse to the laws of this free and enlightened country, to establish their extravations and preventions, and they harase their brethren with criminal and evil prosecutions, to demonstrate the formation of a line of the formation of the same discount of the chief of the same discount of the same discount of t panied with fearful denunciations, they make no impression. They resort to testimonies of discussional, but with no better effect. Finally they have recourse to the laws of this free and enlightened country, to establish their extravagant pestensions, and they harase their brethren with criminal and civil prosecutions, to demonstrate the country of with criminal and erril prosecutions, to demonstrate that the few ought to govern the many, and that they are that favored few; and that they are influenced by the meek, forbearing, and peaceable spirit of Jesus, having the exclusive right in the power of the church!!!

Here we might safely rest the argument, for the doctrines of legitimacy, as they have respect either to church or state, are exploded in this happy quarter of the world; but as this "Declaration" contains a "narrative" of events and a number of charges against Friends, both

and a number of charges against Friends, both of which are, in the main, spurious, we will proceed to a brief inquiry of each. Omitting the less important matter, we will take up the matrative at page 7 of the declaration, and procood part passe, with such a history as can and will, hereafter, be fully authenticated, leaving the reader to compare it with the spurious one

Elias Hicks, having obtained, in the summe Elias Hicks, having obtained, in the summer of 1822, certificates from his Monthly and Quarterly Meetings, to pay a religious visit to parts of this Yearly Meeting, came to Philadelphia in the 12th month of the same year, from the Southern Quarterly Meeting. Two individuals, residing near Philadelphia, attended that Quarter, and preceded Elias Hicks, on their return, with a report of his having preached certain permicious doctrines in that meeting, instead of laying their concern before Elias Hicks in person, before leaving the meeting, or neighof laying their concern before Irina flicks in person, before leaving the meeting, or neighborhood, agreeably to the order of Society, they carried their report to some of the elders of Philadelphia. The "organization of a party" had already been secretly effected in this city, at the head of which stood a number of the members of the Meeting for Sufferings. The members of the Meeting for Sufferings. The elders were, therefore, prepared to act on the report, and usurping the other of the scuthern elders, and comming at "Take bearing and de-traction," two of their number went to Elias Hicks as soon as he had come into the city, and on stating what was reported of him, the latter Hicks as soon as he had come into the latter on stating what was reported of hom, the latter asserted it to be groundless, and a certificate in proof, was subsequently produced, agened by three members of the Southern Quarter, who had been present at the meeting where the objectionable opinions were stated to have been uttered. Thus, however, do not meet the object of the "party." and they requested an interview between E. "The instruments.
"The insatiable thirst of men after religious or civil empire," says W. Pean, "has filled almost every age with contests." The city elders not content to exercise their functions in their examples merely, where the discipline had confined them, erected themselves into a tribused of the measure, and a general opposition was manifested, which all whose property and specific productions with the

years evinced a persevering struggle on their part to secure these, to them desirable ends; and a corresponding effort on the side of Friends to maintain those rights, and that order, long sancto the object. In these meetings Friends were treated as strangers or aliens; complaints were carried forward against them under various pretexts, and they were finally constrained texts, and they were finally constrained to seek protection from the neighboring Monthly Meetings. In the Quarterly Meeting the conduct of the Orthodox was equally destructive of order and harmony. The proceedings against Green street, the only Monthly Meeting where any thing like order was maintained, continue to be marked by a degree of impostice and oppression scarcely exceeded oven in the dark and persecutive.

Hopes had been entertained that the Yearly Hopes had been entertained that the Yearly Meeting's ould apply a remedy to the well known incorders of the Quarterly Meeting of Philadelphia, but year after year passed over, and nothing was done. Had any other meeting, fallen into a similar state, prompt measures would have been taken, but the authors of the disorders in the city were at this period amongst the most influential and active members in the Yearly Meeting, and the clerk a leading member of the party; hence they succeeded in averting an investigation, the result of which could not but be imprious to their cause. rious to their cause

In the mean time, the Southern Quarter be-leving that the services of their representatives in the Meeting for sufferings, had ceased, releasthem and appointed others in their stead The new members on presenting themselves with their credentials before the Meeting were refused a seal, on the ground that it was a per-manent body, and not to be changed by its constituents. This, with the other arbitrary mea string. The with the other arbitrary measures of the Orthodox, gave use to the propositions sent up from two of the Quarterly Meetings that the appointment of elders and members of the Meeting for Suferings "should be made for a limited time." This was granted, but so determined was the hostility manufested against him, that it was not thought proper to meet them, without the presence of some Friends as witnesses; but on scenig them, they refused to enter on the investigation, and, thus proving that their object was not houest, open inquiry, but one of a secret, inquisitarial character, relief to the daily like of a meeting as divided and discretible house in the public house in the village on the 31st that their object was not houest, open inquiry, but one of a secret, inquisitarial character, re-The two individuals who had acted so disorderly in this business, refissing to make any achanowledgment, were subsequently discoved by their own Monthly Meeting, and on an appeal to the Quarter the proceedings were continued by the Yearly Meeting, through the influence of the Yearly Meeting, through the influence of the instruments.

In the exercise of their sacred functions, ministers were thus liable to be harassed, and persecuted by every sile report which tale bearers might whisper in the listening cars of the secret tribunal, whose shield would protect them from the operation of the discipline!

Having excepted these mares, E. Hicks proceeded to accomplish the object of his vest; and having laid before the Green street Friends his groupest of visiting the families there, it was according laid the simplatic for that deep rooted heatility against it, which the orthodox party has since manifested to a degree in the description.

Franklin, (Tenn.) July 18.—We have been informed by two respectable gentlemen, that some time about the 4th of the present met, perhaps on that very glorious day, a man by the name of Hicks living in the neighborhood of Nolensville, in this county, caught, on some small wager, 15 snakes, in about twice that number of monitors from a neighboring strain called small wager, 15 snakes, in about twee that mine ber of minutes, from a neighboring stream called Mill Creek. We witnessed, on Tuesday last, a circumstance which we believe is rather a singular one in the history of the animal world. A rat was thrown into a box containing one hundred living rattlesnakes, for the purpose of showing the manner of attack by these reptiles. When first thrown into the box, he evidently excited considerable displeasure amongst the serpents at the sight of such an intruder. They, however, made no immediate attack upon him, but put their heads rather boldly around him, apparentthe sight of such an intruder. They, however, made no immediate attack upon him, but put their heads rather boldly around him, apparently for the purpose of examining his make and quality. The rat taking this impertinence in high dudgeon, soon began to play his part among his new comrades by adopting their own mode of warfare, and buting every one that presumed to come within his reach. His usual aim would the other head and neck of the stakes, where to come within his reach. His usual aim would be at the head and neck of the snakes, where he would fasten his teeth so firmly that they would frequently drag him the whole length of the box before he would let go his hold. In this way he soon became master of the field, and by perely turning his head towards them, the snakes ould retreat to the back ground for safety .-However, to close the scene, after the rat had been in the box four or five hours, one young snake, of more courage than his compan placed himself in a posture of attack, and by one effectual blow, put a period to the conquests of the warrior rat.—Watertown Register.

MOSES SWARTS .- The annals of swindling MOSES SWARTS.—The annual of swinding of not furnish a more accomplished rogue than Moses Swarts. It will be remembered by our citizens that he visited this town a short time since, and succeeded in defrauding Capt. Childs, of Warren, in an expert manner, out of an inconsiderable sum of money. When we hear of such a character as *Moses Swarts*, it becomes the duty of those who conduct the public press, to present him fairly to the public, and to caution the people against being ensuared by his fraudu-lent practices. Swarts were a Jewish beard, extending down to his breast, and was clad in Rebrete costume. Although a stranger in this place, and pretending to be one in the country, it now appears that he was known at the South that at Baltimore, but a short time before, he had succeeded in cheating a gentleman of restabilities of the straight of the straig pectability out of a large sum of money, and no therewith content, had subjected him to criminal prosecution, which terminated in the conviction of an innocent man. The facts of this aggravated case have been thus represented to us. Swarts, with a companion as worthless as himself, obtained a loan from a gentleman in New York of six or seven hundred dollars on pledge of a gold snuff box, set with diamonds, and some strings of pearl of some value.—The snuff box was cased in a wooden fancy box, and sealed in a buckekin bag, stamped with Swarts initials in Hebrew characters. If the box was not redeemed in six months it became absolutely the property of the pawnee. From Now York therewith content, had subjected him to crimi property of the pawnee. He offered the merchant to whom he applied for the loan, to secure him on the boxes of goods, or if he prefer-red it, on a gold snull box set with diamonds, which afterwards proved to be the identical one pawned in New York. After ascertaining the ue of the snuff box the merchant, whose name

R. M. Anker, advanced Swarts the money nd the snulf box enclosed as before stated, was the presence of witnesses delivered in pawn nker and two or three other persons saw the snuff box deposited in the buckskin bag and scaled up. It proved however to be a delusion, for a tin box was substituted in the place of the gold one, which was retained by Swarts. In the evening, Mr. Anker imagined that his treasure was not as heavy as it appeared when he took it from Swarts; he went to Swarts and requested him to take back the box and give him up his mo-ney, which was refused, whereupon Mr. Anker had the box opened in the presence of a magis-trate, when to his astonishment, he found his suapicions realized, and that he had been jewed.— He sued the Jew and held him to bail. Swarts thereupon procured Anker to be indicted for cheating him out of the snuff box, and on the testimony he was able to procure, Mr. Anker, a respectable merchant, was convicted, fined 500 dollars, and sentenced to nine months imprison-ment. Previous to his visiting this town his vil-lainies were detected. Mr. Anker's innocence May be long fully established and Segue anded the

KITE COACH.

At the Ascot Heath races in England, attention was attracted by a novel exhibition, and which was no other than the famous Kite Coach, which, drawn by two Kites, travelled at a rapid pace, at the back of the Royal Stand. His Majesty left the front of the Stand, in order to have a full view of it. On our return from the races, we had a better opportunity of witnessing the power of this extraordinary machine; an immense number of carriages were assembled about half a mile this side of Staines, and the Kite Coach starting with them not only left them in the lurch and passed every thing on the road, but actually beat Mr. Shearman's Bull and Mouth Coach (a quick one) by half an hour, in the short distance the starting with them had a houth coach (a quick one) by half an hour, in the short distance the starting with them and the starting with them to the starting with them the starting with them to the start KITE COACH. quick one) by half an hour, in the short distance between Staines and Smallberry Green, 8 miles It was managed by the inventors, Mr. Poccel

Near the village of Kilkee, on the western cast of Ireland, is a natural curiosity which do not recollect to have seen any where men-tioned by travellers. It is called the Pulingtioned by travellers. It is called the Puffing-hole, and consists of a cavern at the base of the cliff, the mouth of which opens on the Atlante, and which after burrowing the land to a cossi-derable distance, runs up to the surface is a natrow neck, resembling at the top the mouth of a well. When the tremendous sea from abroad rolls in, it is as though the great body of water rolls in, it is as though the great body of water were forced into an inverted funnel, its impetus, of course increasing as it ascends through the narrow neck until it reaches the upper opening or Puffing-hole, through which it jets to an atonishing heighth into the air, sometimes serval hundred feet, and then falls in rain on the mossy fields behind. CADIZ, April 29.

An old monk, named Fray Gabriel, belonging to the convent of the Franciscens in this city, has come to his death in the following tragical maner. This old man being very fond of music, and an excellent performer on the organ and piano, was in the habit of assembling in his spartment several young men who showed a taste for music. Amongst these was Saturnino Gordini, the son of a deceased Italian merchant, to whom Fray Gabriel showed a particular attachment. When the infirmities of the old monk prevented him from presiding at the organ of the church, it was Saturnino Gordini who always replaced him.—Saturnino, though in other respects a very well-conducted young man, was unfortunately addicted to gambling, and had, as it afterwards appeared, lost his last pisastre in the pursuit of this fatal passion. Whilst in this predeament the steward of the convent gave him a bill of exchange for 4,000 reals, and requested him to take it to the bankers and get cash for it. This he accordingly did; but before returning with the money, he entered a gambling-house epposite the theatre, and lost the whole sum. On quitting the gambling-house he went directly to the cell of Fray Gabriel, and asked him for the loan of 4,000 reals. "Murder! Murder!" His cries brought the Monks and several persons who were passing by the convent at the time into the cell. Being found alone with the dead body, and his clothes being sprinkled with its blood, he was arrested, and, a searching his acrean, the blood working his acrean, the floody poniard was on searching his person, the bloody poniard was found in his pocket. When brought before the Alcade he acknowledged his crime, and gave the above mentioned detail, adding that, at the moment of its commission, he was beside himself; that his honour and reputation were compromi-sed, and, seeing that Fray Gabriel refused him the favour he asked, se la habia subido el santo al ciclo (he despatched the saint to Heaven.)

of procrastination that causes the neglect. While the house stands, it appears safe; and when it is burnt it is too late to insure, so that the Insurance company is without the profit of the premiumwhile the building romains, and its unhappy owner with-out its value when it is destroyed. We are aware that those who calculate exactly in the doctrine of chances, will say, that if the chance of the house's safety was not greater than of its being destroyed, Insurance Offices could not exist; and destroyed, insurance office come may profitably being so, the owner of a house may profitably incur the risk of its being burnt; such a doctrine undoubtedly good for those who care to practice it; but the man who by economy and industry, has secured the means of purchasing a mall or a large tenement, would better conter himself with a rent diminished by the amount of nsurance-or if he occupies it himself, to have his expenses increased by that amount, than in the greediness of gain, to find all snatched from him at a single swoop. It is true the building may not burn down; and then in many years, the premium of Insurance will become considerable in amount; but every day's experience shows that it may burn down, and then where is the long and slowly accumulating horde, the means of comfort to age, and the sure patrimony of dependent children? To those who value case of mind, the very trifle that is demanded by an Insurance Company as a premium, can enter into no comparison with the anxiety that the continued danger must cause, and to those whose success in business depends in some measure upon credit, how advantageous must it be to have it known that the reliance upon property

secured by a full and effective Insurance. By the little sacrifice that Insurance requires, that sympathy of strangers which sometimes is o oppressive, while it is necessary, might be spared; and the evils, present and future, of oppressive dependence, might be avoided. This is an important consideration, and should command

the attention of every parent.

Let every man who has property, liable to accidental destruction, inquire whether he and his family could easily sustain its loss; whether if it was burnt and otherwise wasted, they would not be seriously incommoded, if not reduced to frightful extremity, and then ask whether it would not be better to insure, be safe, and free from anxiety?

All accounts that we receive from France, concur in representing La Favette in the full exercise of his faculties, blessed with health and a flow of spirits, and above all, as ardent in his love of liberty as when he left his native country, surrounded by friends and wealth, the admiration of age and the envy of youth, to aid in the achievement of our nation's independence.

ber of Deputies, in which the principle of Li-berty is involved, the energies of La Fayette are called forth in the cause which he esponsed in his youth, and his manly voice is heard firm in negativing an injurious proposition, or assenting to one of a favorable tendency.

To few men is such a length of days allowed as La Fayette has known; to still fewer is it permitted to look back upon more than three score years, almost exclusively devoted to public affairs, under almost every vicissitude of principles and government, and find the whole course unmarked with a variance from the first resolves. The youthful voice of La Fayette was raised for The youthful voice of La Fayette was raised for Liberty and the rights of man; his youth's VIFRY, aged about 70 years. sword was drawn in the defence of those principles; his fortune was lavished to support those who had devoted themselves with less advantage to the same cause; his first blood stain was in the cause of human rights; his first sufferings were for the emancipation of his country; and his last prayer will be that the cause which he nobly aided in youth, for which he deeply suffered in manhood, for which his age forgot its rest and natural claims, may prosper, extend and and bless, till the whole earth shall feel its in-

At a train At a training in one of the northern counties of this state, saveral years since, the profession merits of two drummers, a certain Ren Morse drum major to the regiment; and a very uncer tain Tom Burnham, a candidate for the same of for, were discussed very freely by the solitors, over a pint tumbler of blue ruin, at a cake and beer shantee without the centry. Some manalimed that Burnham was the best musician, others again that Morse had not his superior in others again that Morse had not his superior in the six counties, when a long lambra-jawed, freckled fixed chap, standing some ax feet four, without either stockings or shoes, elbowed his way into the ring, with an old rusty Queen Am's frelock in one hand, and a card of tye guiger-bread in the other, and after picking his teeth with his bayonet, and wriging his face on something that served as an opology for a coat-slewe, addressed one of the company thus.

Some years since a costom prevailed in a town of Berking, in Essex, when a husband had been heating his wife, the surrounding gossips contrived in the night to empty a bushel of shaff at his door, and in the morning the common saluhis door, and in the morning the common station of all who met him was, "So, neighbour, you have been threshing, I see." This sort of jering, it is said, had the desired effect, for it was a rare thing to see a second bushel emptted at the same door.
